

Name- Vivek Thakur

Branch- BTech. CSE 6th semester

Shoolini University, Solan(H.P)

Project-Build a E-commerce website using wordpress.

Steps Followed during the course to complete the project:

- 1.Download Xampp server.
2. Download wordpress and install wordpress on localhost.
3. Created a account on godaddyacademy.com and completed two helpful courses on website.
4. build my own website using wordpress on localhost by importing plugins and themes.
5. After completing the website on localhost we buy domain on in.godaddy.com.
6. The last step is to move the website from localhost to live Server.

Extra Videos that I found helpful during the course. when I got stuck.
